

**EXPERIMENTAL EVIDENCE OF NONLOCAL CORRELATION  
BETWEEN THE BRAIN/CONSCIOUSNESS OF SUBJECTS IN  
DIFFERENT LOCATIONS DURING  
THE GLOBAL PEACE MEDITATION/PRAYER DAY  
OF 20<sup>th</sup> MAY, 2007.**

**The experiment, carried out in Italy, provides scientific proof of the synchronization of the brain functions of two groups of people in meditation at a distance of more than 200 km. from each other.**

A scientific experiment to test the brain synchronization of two groups of meditators at a distance of 200 km was held on the 20th of May 2007, during the Global Peace Meditation/Prayer Day. The Global Day had more than 300 thousand participants in 54 countries. The experiment, developed by Dr. Nitamo Montecucco of the Cyber Holistic Research Institute of the Global Village in Bagni di Lucca in collaboration with The Club of Budapest, has been carried out with two computerized electroencephalograph instruments synchronized up to the hundredth of a second through devices connected to the Global Positioning System, analyzing data from eight subjects meditating in Bagni di Lucca (Tuscany) and eight subjects in Milan.

The experiment highlighted a highly significant statistical correlation between the two groups, with an average synchronization of **0,64%** and peak values up to **5,4%**. Such results are striking, considering that the classical expectation of correlation between distant groups that are not in any known form of communication with each other is **0%**.

The above results give scientific proof of the existence of “nonlocal” connection between the brain and consciousness of different people while in a state of meditation. They provide supporting evidence for the possibility that a “planetary consciousness” is currently emerging, with non-local connection in this instance among the 300 thousand meditators who participated in the Global Peace Meditation/Prayer Day. This connection transcends, very likely for the first time in history, all geographical distances as well as all national, racial, cultural and religious boundaries.
